

Neutral Cleaner

ALL NATURAL EMULSION CLEANER

NEUTRAL CLEANER is an all-natural emulsion cleaner. When used as received, is for exhaust trails, wheel wells and flap cleaning. It was developed for those hard to clean areas of aircraft that become encrusted with heavy accumulations of grease, gear oil, and Skydrol®. AeroSafe Neutral Cleaner, when diluted, is also used for the full exterior washing of aircraft surfaces. No need to purchase two cleaners when one will do! Its neutral pH properties make it gentle on painted surfaces and for the personnel that use it, but, it's formulated to eliminate the hard scrubbing associated with aircraft cleaning. AeroSafe Neutral Cleaner is approved to the following specifications: Boeing D6-17487 Revision M, Douglas CSD #1, AMS 1526B.

NEUTRAL CLEANER is a concentrated cleaner and degreaser which contains no alkalis, acids or other harsh chemicals. It contains a blend of synthetic detergents and solvents that are biodegradable and is safe on metal and painted surfaces when diluted and used as directed. It is medium foaming liquid, amber in color with a pleasant citrus scent. Dilution will vary with the type and amount of wheel well or flap soil. For heavy cleaning, degreasing and deodorizing use as received and apply with a pump sprayer. For exterior washing, dilute up to 1 to 8.

Neutral Cleaner will also control odors and eliminate grease build up. When used straight, Neutral Cleaner makes for an excellent sewer degreaser. It may also be used to remove various inks and dyes, as ink from ball point pens.

Technical Data

Dilution	Varies with application
Flash Point	165°
Flammability.....	Combustible
Odor	Citrus Scent
pH 1% solution	8.2
Emulsification.....	Rapid
Wetting Ability	Excellent
Operating Temperature.....	Ambient
Storage Conditions	Normal Warehouse
Storage Life	Over One Year
Foam.....	Controlled
Toxicity.....	Not Classified as Toxic
Biodegradable	Yes

HEALTH-1, FLAMMABILITY-2, REACTIVITY-0
