SuperCORRA
 CORROSION PREVENTION COMPOUND

Super Corr-A is a superior lubricant and corrosion preventative compound (CPC) that is a self-repairing film. It is the only product of its type that is non-flammable with guaranteed water displacing properties that out performs all others. Super Corr-A meets and exceeds Mil-Spec L-87177-A. NAVAIR 16-1-540 (Navy) • Tech Order 1-1-689 (Air Force) Tech Manual-1-1500-343-23 (Army). Approved in US Tri-Service Corrosion. Manuals Exceeds Mil C 81309 Corrosion Prevention Compounds. NSN Number 6850-01-528-0653.

elixair

The Elixair family of polysulphide sealant and adhesive removers is the quick, easy and safe way in a systems approach to this arduous task. Combine SkyRestore thin or thick for cured material or SkyWash for wet and tacky removal.

Then use our Boeing and Airbus approved SkyScrapers and the comfortable SkyGrip and that's the "systems approach" to sealant and adhesive removal. SkyScrapers can be sharpened up to 40 times using the SkyMill for big money savings.
